

JOHN MARGOTTI

Senior Software Engineer | Application Development | Production Systems

Jackson, NJ 08527 • 973-951-3866 • johnmargotti@gmail.com

PROFESSIONAL SUMMARY

Senior software engineer with 30+ years of experience building applications, supporting mission-critical production systems, improving enterprise workflows, and leading technical initiatives in 24/7 publishing environments. Builds and deploys applications used by The Wall Street Journal, New York Post, Barron's, and Alexa while serving as an application subject matter expert and lead engineer. Combines full-stack development and AWS experience with production support, project leadership, technical documentation, curriculum development, and instruction as an associate instructor in the field. Currently pursuing a Master's degree in Software Engineering to further sharpen technical expertise.

TECHNICAL & LEADERSHIP SKILLS

Development: JavaScript, Python, HTML, CSS, React, React Native, Node.js, Express, REST APIs, Bootstrap, AI-assisted development

Data & Cloud: SQL & NoSQL databases, PostgreSQL, MongoDB, AWS cloud deployment

Systems & DevOps: Linux, Git, scripting, application support, system maintenance, software testing, production workflows

Leadership: Team leadership, staff development, performance management, project management, technical documentation, curriculum development

PROFESSIONAL EXPERIENCE

Dow Jones

Feb 2024 – Present

Software Engineering and Production Systems | Princeton, NJ

Senior Software Engineer

Feb 2025 – Present

- Build and deploy applications used by production systems supporting The Wall Street Journal, New York Post, Barron's, and Alexa.
- Serve as the application subject matter expert and lead engineer for multiple projects, providing technical direction and production-system expertise.
- Develop, support, and deploy custom full-stack applications to AWS for production print environments.
- Partner with developers, production teams, and other stakeholders to deliver application updates, new features, workflow enhancements, and issue resolution.

System Support Development Specialist Sr.

Feb 2024 – Feb 2025

- Provided 24/7 support for critical production systems and applications, resolving high-priority incidents and end-user issues in real time.
- Monitored application and system performance, managed escalations, and implemented solutions that improved reliability and operational continuity.
- Created support procedures and technical documentation and trained end users on newly deployed applications and production workflows.

ThriveDX

Feb 2021 – Jan 2024

Curriculum Engineer and Associate Instructor | Remote

Full Stack Development Curriculum Engineer

Jan 2022 – Jan 2024

- Collaborated with a cross-functional team to design and build a brand-new AI Software Developer program from the ground up, including lesson plans, coding exercises, laboratory assignments, and real-world projects.
- Developed modules covering JavaScript, Python, React, Node.js, REST APIs, Git, and applied AI development practices.
- Updated curriculum using instructor feedback, emerging technologies, and evolving software development practices.

Full Stack Developer Associate Instructor (Part-Time Contract)

Feb 2021 – Jan 2024

- Instructed and mentored students in university-sponsored web development boot camps delivered nationwide.
- Taught HTML, CSS, JavaScript, React, Node.js, Express, PostgreSQL, and MongoDB through interactive lessons, assignments, and projects.
- Reviewed all student coding assignments, providing detailed feedback and suggestions along with final grades.
- Ran after-hours code reviews and extra help sessions for students needing additional support.
- Led discussions, evaluated student work, and collaborated with instructors and program managers to maintain relevant course content.

Freelance

Jan 2021 – Jan 2024

Full Stack Software Developer | New Jersey

- Created responsive web and mobile applications using JavaScript, HTML, CSS, React, React Native, Node.js, Express, and REST APIs.
- Designed solutions using SQL and NoSQL databases, deployed applications through AWS and other platforms, and published applications for the Apple App Store.

Advance Local

Apr 1994 – Jan 2024

Production Systems Analyst and Manager | New Jersey

- Supported production systems and workflows across a nationwide 24/7 media organization, troubleshooting enterprise applications and operational issues.
- Developed, deployed, tested, and maintained full-stack applications, production scripts, automated workflows, and system enhancements.
- Led production code and script rollouts for product requests, defect corrections, workflow changes, and system improvements.
- Managed team schedules, daily assignments, service desk ticket delegation, operational coverage, and quarterly and annual performance reviews.
- Directed projects and reported weekly status to the Director of Production Systems while coordinating department meetings and remote collaboration.
- Created technical and project documentation and trained enterprise users on production applications and workflows.
